

My family and I are very satisfied with our present "Do no call" law in NJ. Prior to this we were receiving calls at all hours of the day and night from telemarketers. We felt helpless and violated. With the present law in effect we longer have to experience this intrusion into our personal lives. I'm proud that our NJ law is more comprehensive than the federal law. Rather than bending to "special interests" you should look to pattern your "Act" to more resemble ours. The residents of NJ are satisfied with our "Do not call" law. Please leave it alone !
